EDUCATION

M.Sc. in Software Engineering
University of Bucharest
2022 - 2024

Erasmus Mobility Semester
University of Würzburg
Oct. 2023 - Mar. 2024

B.Sc. in Computer Science
University of Bucharest
part of the performance group
2019 - 2022

PUBLICATIONS

- Let's talk security: Salted password hashing in C# - over 70,000 views - 2016
- Enhancing Hootsuite Analytics' onboarding experience with realistic demo data - 2025

HONORS & AWARDS

- innovation award winner - SmartHack - 2022
- hackathon participant – SmartHack, DevHacks, Hacktoberfest - 2019
- bronze medal – National Olympiad in Information Technology, C# - 2018
- participant – Olympiad in Informatics, national phase - 2016, 2018
- 1st place – InfoEducatie national programming contest - 2017, 2018, 2019

CERTIFICATIONS

- MTA: Software Development Fundamentals - certified 2018

HOBBIES & INTERESTS

free & open source software, retro technology, design, DIY projects, lindy hop, volunteer work

EXPERIENCE

Hootsuite - Software Engineer — Apr. 2024 - Present

- developed **microservices** for the global Analytics DAQ pipeline using **Go, Python, MongoDB, Kafka, gRPC, Kubernetes** and monitoring tools such as **Sentry, SumoLogic, Graphite**.
- led the end-to-end design of an **event-driven system** to provide users with an **accurate time estimation** of the data ingestion process during onboarding
- architected a parallel processing flow connected to the existing pipeline to **extend data freshness** from 1 month to 1 year without hitting rate limits
- scripted a mapping of the **entire platform metrics library** to create a source of truth document, aligning technical implementation with product outcomes
- engineered a **simulation engine for realistic time-series data** featured in a company blog; independently **led the project** from design to delivery
- fostered engineering culture by **presenting technical topics** in our guild meetings, facilitating cross-team discussions, and organizing office watch parties for selected technical talks from open-source congresses (FOSDEM, CCC).

Bloomberg LP - Software Engineer - Internship — Jun. 2023 - Sept. 2023

- developed a tool for **generating data pipelines** declaratively by using configuration files - Python, Jinja2, PyTest, serverless functions
- successfully demonstrated the generator's viability by generating and **replacing an existing pipeline** responsible for ingesting 40 million records per day

University of Bucharest - Teaching Assistant - Part Time — Oct. 2022 - Jan. 2023

- taught foundations of microcontroller programming with Arduino in C++.

Bitdefender - Software Engineer - Internship — Jul. 2021 - Sept. 2021

- **implemented client-side logic and public API endpoints** for new production features and extended the core licensing codebase to support a composite scheme (JavaScript, PHP, MongoDB).

OPEN SOURCE PROJECTS

Arcada – — Jan. 2022 - Jul. 2022

- web app for creating **interactive floor plans** - **200 stars** on GitHub
- accurate to scale, printable, multiple floor support, save/load features, extensible component library
- written using **TypeScript, React, Pixi.js, Zustand, Express.js and MongoDB**

Downbeat – — May 2020

- cross-platform retro **digital piano**, with recording and playback support
- written in **C++ using SFML**

Ripple – — Mar. 2019 - Aug. 2019

- **mobile app** platform that **serves daily lessons** to users to encourage better study habits, featuring customizable learning paths and tests
- created using **Angular, Ionic, Cordova, SQLite, written in HTML, CSS, TypeScript**
- winner of the InfoEducatie National Contest, Educational Software, 25th edition

LearnAnatomy – — Jul. 2018 - Aug. 2018

- **desktop application** that helps anatomy students **study the human skeleton,** featuring 3D models and mini games - **Unity, JSON, Git, C#**
